Organisational skills and competences

I am now an associated partner of an international corporate based in Oregon, US: Andromeda Systems Engineering, the mission of which is to create the systems engineering lean standards of the TewntyFirst Century.
 I am an excellent project manager. Very efficient in all the phases of the project lifecycle, from conceptual discussions, to requirements management, to test engineering, system integration and commissioning.
 Since late 90's I focus on systems engineering and project lifecycle management, and I am the outhour of an original lean and not expensive methodology, compliant with all the main standards (ISO, ESA, MIL, CMMi, SPICE).

Technical skills and competences

I made conceptual design of solutions for complex traffic management problems: I designed the system solution for the Gran Sasso tunnel (10 km long) and for the emergencies management of the Bridge over the straight of Messina. And I can design the technological plants for tunnels, highways, railways, bridges and big works in general.
 I participated to several feasibility studies in the aerospace domain, for ESA ITTs and European Calls.

Computer skills and competences	I am an old software designer, and I still like to write software. Main languages: VB, VC++, Fortran, several assembler for microprocessors, PLC languages (Siemens, Allen Bradley, Schneider Electric). Operating Systems: MS Windows XP Professional, MS Windows Server 2003, Unix, Linux SQL: MS SQL Server, MS Access, MySQL, Oracle
Artistic skills and competences	Modern jazz electric guitar. Writing essay books. My book "La Terra non è malata: è incinta!" was published in 2008 by Arduino Sacco Editore, Roma.
Driving licence	B Italian license (normal driving license, for cars and small cargo vehicles)
